

# H Spur Horses Information Sheet

**Corona Bluez** – AQHA Gelding  
*2020, 15.2hh, 1,250#, Bay Roan*

**Diet** – 2 flakes of alfalfa twice daily with turnout and grass hay hung in pen or stall as a ‘busy bag’.

**Farrier** – Last shod November 11<sup>th</sup>

**Chiropractor** – Last visit November 24<sup>th</sup>

**Bits Used** – Medium shanked smooth snaffle or dog-bone

**Extra Info** – Corona Bluez is on consignment with us. He presented a sore back within the first month he was here. He was taken to the vet and x-rays were done of his back (available to be viewed online) where a few, small calcification spots were seen on three vertebrae. The spacing is normal. He is not a candidate for surgery at this time, but we did find those lesions when investigating his back soreness. Hocks were also x-rayed and x-rayed clean. His back was injected 12/22 with steroids.
